

Lucas Andrade

Full Stack Software Engineer

São Paulo, SP — Brazil · lucas.andrade@example.com · +55 11 99999-0000 · github.com/example · linkedin.com/in/example

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 7+ years of experience designing web platforms, backend services and automation systems. Specialized in TypeScript, Node.js, React and cloud-native architectures, with a strong focus on reliability, performance and maintainable engineering systems.

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Jan 2023 — Present

Northstar Technologies · São Paulo, Brazil

- Designed event-driven backend services supporting more than 2 million monthly API requests.
- Redesigned document processing with asynchronous workers and Redis, reducing average processing time by 42%.
- Established automated integration tests and CI/CD workflows across 14 production services.
- Partnered with product and design teams to simplify high-volume operational workflows.

Software Engineer

Mar 2020 — Dec 2022

Atlas Digital · Campinas, Brazil

- Built React applications and REST APIs used by more than 8,000 business users.
- Migrated legacy endpoints to modular Node.js services and improved maintainability.
- Optimized PostgreSQL queries and Redis caching, reducing critical API latency by 35%.

Junior Software Developer

Jan 2018 — Feb 2020

Orbit Systems · São Paulo, Brazil

- Developed internal applications using JavaScript, PHP and SQL.
- Automated recurring operational workflows, saving approximately 15 hours per week.

TECHNICAL SKILLS

Languages	TypeScript · JavaScript · Python · Java · SQL
Backend	Node.js · NestJS · Express · REST APIs · GraphQL
Frontend	React · Next.js · HTML · CSS · Accessibility
Data	PostgreSQL · MySQL · Redis · Elasticsearch
Infrastructure	Docker · AWS · GitHub Actions · Linux · CI/CD

SELECTED PROJECTS

Workflow Intelligence Platform

Multi-tenant analytics platform combining event processing, dashboards and automated alerts.

TypeScript · NestJS · React · PostgreSQL · Redis

Document Automation Engine

Template-driven document generation service for recurring business workflows.

Node.js · TypeScript · S3 · Docker

EDUCATION

B.Sc. in Computer Science

Federal Institute of Technology · 2014 — 2018

LANGUAGES

Portuguese — Native

English — Advanced
